Mole Repellent based on essential oils

Category:

- Mole Repellent

Applications:

- gardens and outdoor spaces treatment

Advantages:

- based on essential oils
- scent-based mole repellent

Product for professional use. The manufacturer declines all responsibility for any damage caused by an improper use of the product.

Applications

Mole repellent, granular based on essential oils.

Ideal product for keeping moles away from lawns and outdoor areas; it acts quickly thanks to the active essential oils it is composed of.

The effect obtained is to make the odors and therefore the relative taste perceived by animals in the environment unpleasant, causing them to consequently move away.

The protection of the areas is immediate.

Method of Use

Ready-to-use product. 1000 ml of product covers a surface of about 500 m². Sprinkle the product inside each hole, about 50 grams, or tunnel and close the opening with the loosened clod of earth.

The product retains its disaccustoming properties for about 10 days.

In case of rain, washouts or removal of the product, repeat the treatments.

Fields of Application:

It is used in all places where there is already a mole infestation in gardens, lawns, fields and flowerbeds.

Use product whenever the infestation occurs or when you want to prevent its return.

It can be used all year if necessary, but period where treatment should be done is from spring to autumn.
